Mount Point check

```bash
#!/bin/bash

path=$1

if test -e "$path"
then
    if test -d "$path"
    then
        if ! mountpoint -q "$path"
        then
            echo "this path exists but not mounted"
        else

            echo "already mounted"
        fi
    else
        echo "this path exists but is not a directory."
    fi
else
    echo "this path not exist"

fi
```

```
[root@dev adhamscripts]# vim mount-point-chk.sh
[root@dev adhamscripts]# vim mount-point-chk.sh
[root@dev adhamscripts]# chmod +x mount-point-chk.sh
[root@dev adhamscripts]# ./mount-point-chk.sh /adham
this path not exist
[root@dev adhamscripts]# ./mount-point-chk.sh /dev/shm
already mounted
[root@dev adhamscripts]# ./mount-point-chk.sh /adhamscripts
this path exists but not mounted
[root@dev adhamscripts]#
```
